# OUTDOOR COIL & SURFACE CLEANER

## Outdoor Coil and Surface Cleaner

Outdoor Coil and Surface Cleaner is formulated to be able to remove the wide variety of materials that build up on coils and associated surfaces over time. With maintenance being key in extending asset life the product not only provides a both time and cost effective solution to cleaning but also is the minimum surface preparation needed for Aeris's Maintenance Corrosion Protection products.

- Targets both organic and inorganic fouling.
- Requires no specialised disposal when rinsed from coils and surfaces.
- Effectively removes scale from condenser coils.

## Problems Caused by Dirty Condenser Coils

- Your air conditioners energy efficiency drops dramatically.
- Your air conditioner is no longer able to cool your home effectively. Your energy consumption goes up significantly while your cooling efficiency and effectiveness drops like a stone.
- The life of your air conditioner unit, a huge home or business investment, is reduced. Manufacturers assume you will properly maintain the unit when they project years of service.
- Cooling efficiency can drop over 30%. At that point, your system is cooling at only 60 or 70% effectiveness.

(Note: as little as 0.042 inch or 1/23 of an inch of dirt can reduce cooling efficiency up to 21%)

| Product Code | Description                       | Dilution Rate | Application Rate                         |
|--------------|-----------------------------------|---------------|--|
| 01-01-00021  | Outdoor Coil & Surface Cleaner 1L | Ready to use  | Specific to machine; please refer to IFU |
| 01-01-00025  | Outdoor Coil & Surface Cleaner 5L | Ready to use  | Specific to machine; please refer to IFU |
